PROFESSIONAL SUMMARY

Full-stack software engineer with 7+ years of experience across Laravel, Django, React, and Node.js, specializing in backend architecture, real-time systems, and third-party integrations. Currently leading development of a clinical telemedicine platform (MityCloud) — architecting a self-hosted WebRTC conferencing system with medical compliance features including PII masking, consent capture, and audit logging. Proven track record of owning systems end-to-end across startups, agencies, and enterprise environments, with consistent results in query optimization, workflow automation, and scalable API design.

TECHNICAL SKILLS

Languages:	PHP, Python, TypeScript, JavaScript (ES6+)
Backend:	Laravel, Django, Node.js, GraphQL, REST APIs, Webhooks
Frontend:	React.js, Next.js 14, Vue.js, Tailwind CSS, jQuery
Databases:	PostgreSQL, MySQL, Neo4j (Cypher), Couchbase, NoSQL
Cloud & DevOps:	AWS, Docker, DigitalOcean, Vercel, Fly.io, Alibaba Cloud, CI/CD Pipelines
Tools & Platforms:	ERPNext/Frappe, HubSpot APIs, Shopify (Liquid), WordPress/WooCommerce, Drizzle ORM, Git, Jinja

PROFESSIONAL EXPERIENCE

Software Engineer | **Infinity MCI Solutions Philippines**

Mar 2026 - Present

Pasig City, Philippines · Remote

- Led full-stack development of **MityCloud**, a **healthcare platform** built with **Django, React, PostgreSQL, and WebRTC technologies**, delivering video conferencing, **DICOM imaging**, and real-time collaboration capabilities for clinical workflows.
- Architected and implemented a self-hosted **WebRTC conferencing solution using OpenVidu**, featuring multi-participant video calls, screen sharing, session recording, whiteboards, annotations, file sharing, and meeting management tools.
- Designed and developed a **patient-information masking system using Canvas and MediaStream APIs**, enabling secure screen sharing of clinical applications while supporting healthcare privacy requirements.
- Built real-time collaboration infrastructure using **Django Channels, Daphne (ASGI), WebSockets, and Redis**, enabling participant presence tracking, live notifications, invitation workflows, chat persistence, and session state synchronization.
- Implemented compliance-focused functionality including **consent capture workflows, audit logging**, attachment security validation, and session activity tracking for healthcare environments.
- Led migration of **MityViewer v3.12** and successfully ported video conferencing modules into the **OHIF/DICOM imaging ecosystem** while maintaining feature parity across applications.
- Maintained and enhanced **3 Django/React production systems**, improving **PostgreSQL query performance by 20-40%** through indexing and query optimization

Backend Development Lead | Servanthood Corp.

Jul 2024- Present

Remote · Part-time Contract

- Led backend architecture for a LinkedIn-style networking platform for musicians, built on **Neo4j graph database and GraphQL APIs**.
- **Designed scalable graph data models** supporting complex relationships between users, businesses, media assets, and social connections.
- Reduced average GraphQL query response time by 40% through strategic Neo4j indexing and Cypher query refactoring.
- **Configured webhook-triggered CI/CD pipelines** on DigitalOcean enabling automatic pull-and-restart on pushes to develop/main branches.
- Integrated **Microsoft OAuth2 and Outlook SMTP** for secure transactional email delivery within the platform.

Software Engineer | NCS Philippines Inc. (formerly Yondu Inc.)

Jan 2025 - Mar 2026

Taguig City, Philippines

- Architected and deployed **ERPNext/Frappe** solutions across 6+ departments, automating manual workflows and reducing process time by 60% across procurement, HR, and finance operations.
- Engineered custom **Python automation scripts** that transformed hours-long administrative tasks into sub-minute automated processes.
- **Integrated HubSpot CRM with the ERP system via REST APIs and webhooks**, achieving bi-directional sync of 14,000+ customer and deal records at 99%+ data accuracy.
- Built 20+ dynamic SQL-based reports and 25+ custom Jinja print formats powering executive dashboards, operational tracking, and compliance documentation.

Software Engineer | Fumaco, Inc.

Jun 2021 - Jan 2025

Caloocan City, Philippines

- Delivered 3 mission-critical production systems (Logistics Tracking, Automated Backup Management, Inventory Extension) using **Laravel and Node.js**, supporting 200+ daily active users across operations teams.
- Re-engineered a legacy **WordPress/WooCommerce** store (1,000+ SKUs) into a custom Laravel e-commerce platform, improving page load times by 40% and increasing checkout conversion rate by 15%.
- **Containerized 7 microservices using Docker**, reducing deployment time by 60% and ensuring consistent development/production environments.
- **Optimized ERPNext and MES** reports, cutting execution time from 30 seconds to under 5 seconds through query optimization and caching.
- Built and maintained a **Shopify storefront** handling 300+ monthly orders with automated order syncing to internal ERP systems.
- Mentored junior developers on Laravel and Node.js best practices through code reviews and pair programming sessions.

Web Developer | Crius Digital, LLC

Sep 2019 - Dec 2020

Makati City, Philippines

- Developed custom e-commerce sites and internal business systems using **Laravel, WordPress, WooCommerce, and Shopify** tailored to client requirements.
- Provisioned and managed DigitalOcean hosting infrastructure for multiple client deployments, ensuring reliable uptime and deployment consistency.

EDUCATION

Bachelor of Science in Information Systems

Graduated April 2019

La Concepcion College, Inc. · City of San Jose Del Monte, Bulacan
